this is the first and only book to offer a comprehensive survey of accounting research on a broad international scale for the last two centuries its main emphasis is on accounting research in the english german italian french and spanish language areas it also contains chapters dealing with research in finland the netherlands scand

accounting standards are an essential element in the regulation of current financial reporting standard setters promulgate such standards and companies and professional accountants follow them in preparing financial reports although much has been written about the history of standard setting the conceptual underpinnings of accounting standards the process of setting them and whether such standards should be rules based or principles based there has been little written about the kind of thing they are

this book examines the nature of accounting standards and the very idea of a rule of implementation guidance and of the objectives that are included in them it enables the reader to grasp the reasons for promulgating standards the role of the conceptual framework in setting standards in an institutional context and the kind of rules that are useful in regulating financial reporting the insights provided by this examination are used to throw light on the distinction between principles based and rules based standards and on the nature of good accounting standards

this text presents an accessible introduction to techniques and applications of economic analysis and financial accounting as a method for approaching real life business problems for managerial decision making in a logical manner it focusses on the essential skills needed to formulate business policies that help gain a competitive edge in today's work environment the book discusses the basic concepts terminology and methods that eventually allow students to interpret analyse and evaluate actual corporate financial statements it covers the major areas of managerial economics and financial accounting such as the theory of the firm the demand theory and forecasting the production and cost theory and estimation the market structure and pricing investment analysis accountancy and different forms of business organisations the book includes numerous examples problems self assessment tests as well as review questions at the end of each chapter to aid in working out solutions to business problems the book will be particularly suitable for courses in managerial economics and financial accounting as part of an engineering degree education at undergraduate level where the students have no previous background in economic and financial analysis it will also be immensely useful for m b a m com and c a students business executives and administrators who need to learn the application of economic theory to realistic business situations
